Daksh Game BaaS

15-Day Autonomous Sprint

Full Suite: Multiplayer Netcode • Analytics Telemetry • Economy V2 • Dual Payments • Helm Only

AI Squad: Antigravity + Claude + Codex

💳 Razorpay (INR) + Paddle (USD)

deploy/helm/daksh

TIMELINE WINDOW

15 Days Max

Zero Human Coding Required

MULTIPLAYER SUITE

Turn-Based + Relay

AccelByte Matchmaking X-Ray

ANALYTICS ENGINE

10K Events/Sec

DAU • MAU • D1–D30 Retention

QUALITY ASSURANCE

100% Automated

8 Automated Testing Layers

All 15 Days | 🎮 Multiplayer Netcode | 📊 Analytics & Telemetry | 💎 Economy & AI Cmd+K | 💳 Dual Payments | 📦 Unity SDK & Helm Eject

Click any filter to isolate modules

DAY 01 Foundation — Claude

Containerized Stack & Local CLI

Docker Compose Nakama 3.22, PostgreSQL 16 & Redis with `npx daksh dev` runner.

✓ Test: Healthcheck HTTP 200 & subprocess boot <15s

DAY 02 Identity — Claude + Codex

Device Auth & Account Federation

Passwordless Device ID auth + Steam, Google Play, Apple identity linking with JWT.

✓ Test: 100 randomized session token signature & refresh tests

DAY 03 Economy — Claude

PlayFab Economy V2 Runtime

Dual currencies (Gold/Gems), item catalogs, and bundle purchase handlers in TypeScript V8.

✓ Test: Row-lock (FOR UPDATE) concurrency test on wallets

DAY 04 Economy — Codex + Claude

Loot Drop Tables & Idempotency

Weighted mystery boxes + transaction deduplication keys for flaky mobile connections.

✓ Test: 50 parallel duplicate requests blocked; 0 double-charges

DAY 05 AI Ops — Antigravity

AI Command Menu (Cmd+K)

Prompt-driven catalog ops: natural language prompts generate complete game economies.

✓ Test: 20 prompt variations parse into valid JSON in <1.5s

DAY 06 Multiplayer — Claude

Turn-Based Multiplayer Engine

Async & sync room state machine for board, card, and pool games with zero-DB simulation.

✓ Test: Turn handoff, timeouts & atomic win commit verified

DAY 07 Multiplayer — Claude

Real-Time Relay Netcode (WS/UDP)

Client-authoritative packet relay for fast-paced action titles up to 64 players per room.

✓ Test: 32 mock WebSocket clients broadcast with <10ms jitter

DAY 08 Matchmaking — Claude + Codex

AccelByte Matchmaking Rulesets

Skill rank delta (MMR), ping limits, and dynamic rule flexing when wait time exceeds 15s.

✓ Test: 100 simulated queue players matched with rule relaxation

DAY 09 Admin Portal — Antigravity + Codex

Matchmaking X-Ray & Leaderboards

Live queue visual inspection tab in studio + real-time Redis leaderboards with tiered resets.

✓ Test: 500 score injections assert sorted rank & queue stream

DAY 10 Analytics — Claude

High-Volume Event Telemetry

High-throughput ingestion of gameplay events (kills, loot, buys) buffered to ClickHouse/Postgres.

✓ Test: 10,000 events/sec batch flush with zero dropped packets

DAY 11 Analytics — Codex + Antigravity

Live Executive KPIs (DAU/Retention)

Visual studio analytics: Daily Active Users, D1/D7/D30 retention cohorts, ARPU & Churn curves.

✓ Test: OLAP aggregations over 100K historical events verified

DAY 12 Billing — Claude + Antigravity

Dual Payments (Razorpay + Paddle)

Geo-routed checkout: India UPI via Razorpay (INR) + Global Merchant of Record via Paddle (USD).

✓ Test: HMAC-SHA256 signature verifier blocks tampered webhooks

DAY 13 Client SDK — Codex

Unity C# SDK & Offline Disk Queue

UPM package (`com.daksh.sdk`) with async/await, Device ID auth & persistent disk cache.

✓ Test: 24 NUnit mock tests assert 0 lost actions on reconnect

DAY 14 DevOps — Claude + Antigravity

Helm Chart Only & 1-Click Eject

Production Helm v3 chart in `deploy/helm/daksh` + 1-click zip export with Helm & Postgres dump.

✓ Test: Helm dry-run lint passes; unzipped export boots clean

DAY 15 RELEASE — All AIs

Air-Gapped Test & Public Launch

Kills WiFi; executes complete game loop offline + 5,000 CCU stress test; releases Git v1.0.0.

✓ Test: **22/22 routes build green; 0 TypeScript errors**

- Every single day delivers production code AND its automated verification suite.
